Caregiver PIONEER Study

Caregiver Prioritizing Outcomes, Needs, Experiences and Recovery

What is the Caregiver PIONEER Study?
• The study hopes to give adults the facts they need to make the best health care choices for their child.

Who can join the study?
Parent or Primary Caregiver of a child who:
1. is age 18 or younger
2. has a developmental disability
3. has an emotional or behavior problem

How will this help families like you?
• You will help other families make the best health care choices for their child.

What you will be asked to do if you join the study?
• Complete a 1-2 hour interview in a private location like a library with the research staff.
  or
• Complete a survey online or in a private office or library that will take 30 minutes.

Our promise to you:
• We will always respect your privacy.
• We will never use your or your child’s name in anything we collect or in any papers or flyers we share.
• We will provide you with feedback from the study
• You will get a $50 gift card for being in this study
